ADVANTAGE

**Dependability, performance
and great value**

Features the fit, form and function of premium aftermarket brakes

Competitively priced, high quality alternative to other aftermarket parts

PROFESSIONAL

**Exceptional Alternative to
an OE Part**

Coverage for most makes and models and brake repair needs

Engineered to exacting tolerances for outstanding performance

GM ORIGINAL EQUIPMENT

**Premium Original
Parts for GM Vehicles**

GM OE parts replace those installed during the production of a GM Vehicle

Designed to meet or exceed original-equipment specifications

PRODUCT FACTS

BRAKE PADS – FUNCTION

Flat pads with frictional materials contact the rotor to help slow or stop the vehicle (disc brakes). Available in Ceramic and Semi-Metallic – check your owner's manual and repair professional for guidance on what type your vehicle should use.

SIGNS OF WEAR

Chirping, grinding or squealing noise; difficulty stopping the vehicle.

BRAKE SHOES – FUNCTION

Shoes press against the inside of the brake drum to cause friction in order to slow or stop the vehicle (disc brakes).

SIGNS OF WEAR

Insufficient friction material on brake shoes, reduced braking ability, low brake pedal height, longer stopping distances, squealing or unusual noises, brake pedal pulsation.

ACDelco ADVANTAGE KEY FEATURES
