

Corrosion Protection

GOLD

Vehicles are exposed to not only harsh environments but the corrosive affect of chemicals that are spread on the roads. The ACDelco Gold coated rotor was tested alongside competitive rotors, both uncoated bare and coated/ painted, in a salt spray environment per ASTM: B117 for a minimum of 312 hours. The results showed that the COOL Shield™ rust preventative coating used on ACDelco Gold coated rotors performed better at preventing the extreme corrosion affecting several competitive rotors.

ACDelco Gold Coated Rotor

After 480 Hours of Salt Spray exposure

Competitive Bare Rotor

After 480 Hours of Salt Spray exposure

Rotor corrosion comparison **before** and **after** 312 hours of salt spray exposure

| | ACDelco Gold Coated Rotor | Competitive Coated Rotor A | Competitive Coated Rotor B | Competitive Coated Rotor C |
|---|----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|
| BEFORE Salt Spray exposure | | | | |
| AFTER 312 Hours of Salt Spray exposure | | | | |
| Vanes AFTER 312 Hours of Salt Spray exposure | | | | |

The entire rotor surface of the ACDelco Gold rotor, including edges and vanes, has a zinc rich coating for durability and longer lasting protection compared to an uncoated rotor or competitors' coating.

24 Month/40,000 KM Limited Warranty: Our most common Parts Warranty offers coverage on the majority of our Genuine GM Parts and ACDelco service replacement parts. Effective on parts purchased February 3, 2020 and later to the original retail purchaser. Contact your ACDelco parts supplier for limited warranty part details and qualifications.

Corrosion Protection

GOLD

ACDelco Gold & Silver brake pads utilize premium quality 301 stainless steel hardware, ensuring smooth operation in the caliper bracket, stop after stop, through even the harshest of conditions.

Upon completion of SAE J2521 noise testing, ACDelco Gold brake pads and leading competitive offerings were subjected to 360 hours of salt spray exposure per ASTM: B117 procedures. The results showed that the powder coated backing plates on ACDelco brake pads provide an extra level of corrosion prevention, reducing the propensity for rust jacking and seizure in the caliper bracket.
