

Remanufactured Coated Calipers

GOLD

ACDelco offers a remanufactured caliper with a protective zinc plating to enhance corrosion resistance compared to competitive powder-coated calipers.

HOW CAN THIS PREVENT RUST CORROSION?

ACDelco's coated remanufactured calipers will stand the test of seasonal weather and corrosive road sprays. The protective zinc plating enhances corrosion resistance to last longer and look better. Each part number is engineered and validated so you can be certain ACDelco's coated calipers with all makes coverage is the optimal choice for your brake repair.

WHY ACDelco REMANUFACTURED COATED CALIPERS?

- Long lasting protection from environmental elements such as corrosive road sprays and salt
- 100% new seals and bleeder valves, similar to OE
- Pre-lubrication of critical areas prevents binding
- All recycled hardware ("non-pad-installation" components) are re-plated
- Pad installation hardware is all new and made with quality material
- All cast iron housings (including piston bores) and brackets are plated
- Available bracketed where required

EXTENSIVELY TESTED

- Design follows critical specifications to ensure safe, leak-free operation
- 100% end-of-line quality tested, and pressure tested for leaks
- ACDelco Gold Reman Coated Calipers are quality tested using ASTM B117 salt spray testing to ensure they resist rust and corrosion

New Coated Calipers

GOLD

While 100% new calipers help provide maximum performance, they also eliminate the need to keep old calipers around the shop waiting to be returned for the core charge expense.

The new units are manufactured to strict ISO quality standards, helping to provide the performance, dependability, and consistency you expect from ACDelco.

FEATURES & BENEFITS

Zinc Plating

- Zinc plating on cast iron parts offers corrosion protection from environmental elements and corrosive road sprays.
- Protects new cast iron calipers and brackets, as well as brackets on aluminum calipers.
- ASTM B117 Salt Spray process tested.

MEETS INDUSTRY STANDARDS FOR PERFORMANCE

- Testing to industry standards helps ensure leak-free operation under extreme temperatures and pressures.
 - Including life-cycle testing in hot and cold conditions.
- End-of-line pressure testing helps ensure correct assembly and function.

100% NEW Casting and Components

- New pistons and bleeder screws – copper washers included (where applicable) for trouble free installation.
- Critical components are lubricated for smooth operation.
- New casting means no wear and tear, or fatigue including corrosion and pitting.

NO CORE RETURN REQUIRED!
