

ACDelco®

SYNTHETIC BLEND MOTOR OIL IS A SOLID CHOICE FOR ALL GM VEHICLES.

Uniquely designed to complement the exacting requirements of GM's advanced engine technology.

Advantages of dexos1™ – The dexos™ specification has gone through an extensive developmental and testing process. It requires a number of proprietary tests that are not included in current industry standards and sets performance criteria at a level that exceeds many current standards. The result is a high performance fluid providing:

- significant wear protection
- improved piston cleanliness
- a reduction in volatility and oil consumption
- enhanced aeration control for improved fuel efficiency
- better oxidation properties

dexos1™ Certified – dexos™ is an exclusive trademark of General Motors. Only those oils displaying the dexos™ trademark and icon on the front label have been certified and licensed by GM as meeting the demanding performance requirements and stringent quality standards of the dexos™ specification.

Importance of licensed dexos1™ – GM has found that using substandard oil can affect engine performance and, in the worst case scenario, may damage or harm the engine. Only licensed dexos™ products have been certified by GM to meet the dexos™ specification. Unlicensed products have not gone through GM's rigorous testing process, are not monitored for quality, and are not approved or recommended for use in GM vehicles. Unlicensed product quality and suitability for GM vehicles cannot be guaranteed and, therefore, use of unlicensed products may result in lower levels of performance and could cause engine damage that may not be covered under warranty.

There are many authentic licensed dexos™ products readily available. These products all bear the dexos™ icon on the front label and unless an oil package displays this brand, the engine oil is not an authentic, licensed dexos™ product and is not recommended for use in GM vehicles.

**For a list of
licensed dexos™
products, visit
www.gmdexos.com.**

dexos™ is specified in the owner's manual for use in all 2011 and newer model year GM vehicles with the exception of Duramax diesel engines which require API CJ-4 engine oil. dexos™ is fully backward-compatible and can be used in older vehicles.

ACDelco®

Product Availability

The dexos™ specification has been developed to help keep engines cleaner, improve efficiency and maximize engine life, all while simplifying the oil selection by providing a single specification that customers can look for and rely on.
