### How do I read the warranty date code on my battery?

The warranty date code is located on the top label of the battery. The first character is either a P or S. The next two digits determine the month, the third digit is the year and the fourth character indicates the manufacturing plant. For example, P 098N means the battery was made in September 2008.

### Warranty and Core Claim Forms

In the event you wish to make a claim under this warranty, you must return your dated bill of sale and your battery, with its warranty insert intact, to where you purchased the battery. If your dated bill of sale is not available, the beginning date for this warranty will be based on the date code as it appears on the battery label.
